

Aeronautical Decision Making - A Unique Prospective

Aeronautical Decision Making as it applies mostly to weather (Airships VERY sensitive to WX) to include: variable winds, Santa Ana winds, marine layer, thunderstorms, gust fronts, weather minimums (aircraft specific and airspace). The importance of constructing a pilot's own safe personal minimums (ceiling, wind, etc) as one builds pilot experience. Blimp 101 --- how blimps utilize both static and dynamic lift to fly, fundamentals of flight for airships, atmospheric/environmental changes affecting lift capability and flight characteristics, and how they apply to general aviation.

Directions: Airport Commission Meeting room, Administration Building. Located on the NE corner of Paularino and Airway Ave. Parking and entrance in the rear of building near the tower, airport west side.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
